

Bridge Gem (v4.1.26) Release Notes

Note that Bridge Gem v4.1.25) and later use the Microsoft Runtime System .Net 10, whilst Bridge Gem v3.0.24 and earlier use .Net 4.7.2.

If you are upgrading from v3.0.24 or earlier you may have to install .Net 10 on your PC. You can download .NET Desktop Runtime 10.0.9 from this link:

<https://dotnet.microsoft.com/en-us/download/dotnet/10.0>

V4.1.26 adds a new feature that highlights the Tables that are sharing Boards. See the **Tables and Rounds** tab in the **Section in Progress** window.

It has also improves the *ease of use* when manually editing Results in the **Boards** tab in the **Section in Progress** window. Use the **Tab**, **Shift+Tab**, **Enter**, and **Up** and **Down** keys to navigate between Results and Cells quickly.

For users who wish to process the Results further and not upload them to Bridgewebs or the EBU, a facility to write the Results to disk as a USEBIO file (see <https://www.usebio.org/>) to disk has been added.

2026-06-21 v4.1.26
